GREAT SUCCESS FOR RUSSIANS IN GALICIA

STRONGHOLD OF PRZEMYSL TAKEN AFTER FIVE MONTHS' SIEGE

CAPTURE OF THIS CITY AND ITS FORTS THE MOST IMPORTANT ADVANTAGE GAINED BY EITHER SIDE DURING THE CONFLICT

Petrograd, March 22.—Przemysl, the strongest Austrian fortress in Galicia, has fallen after a five months' siege.

The garrison of Przemysl numbered about 50,000 men. The surrender releases 150,000 Russians who will now press toward Cracow, "to open the way to Berlin."

CHECKED DRIVE ON OSTRELEKA

Another great battle has opened on the Poland front, extending from Myslenice to Kasidlo. The Germans reached Kasidlo, which is only ten miles from the fortress of Ostreleka, but the Russians halted the enemy there, inflicting heavy losses.

LIVELY CHASE FOR THE LAPLAND

British Liner with Americans on Board Objective Point of a Naval Battle

New York, March 21.—Passengers aboard the British steamer Lapland which reached here yesterday from Liverpool, witnessed a battle in the Irish channel between a British torpedo boat which escorted the Lapland and a German submarine. The Lapland, crowded on all steam, fled in a zigzag line from the combatants. The Lapland joined her escort just outside Liverpool harbor. They were not far from Liverpool when the submarine appeared, and discharged a torpedo at another vessel. Immediately the torpedo boat opened fire, shells from its rapid fire guns tearing the water around the submarine's periscope into foam. The periscope disappeared but in a few seconds oil appeared on the surface of the water and steadily spread into a wide circle, indicating that the submarine had been struck.

The Lapland's captain ordered full speed ahead, and the steamer soon left the combatants far behind.

The Lapland carried 113 passengers. In the staterooms were two American boys, Harold and Howard Hudson, of Bridgeport, Conn., twins about 15 years old, who while attending school near London, enlisted in the British army, giving false ages and not mentioning their nationality. Their parents obtained their release.

WILSON IS WORRIED

COMPLICATIONS WITH EUROPE AND MEXICO MAY CAUSE HIM TO CALL AN EXTRA SESSION OF CONGRESS

Washington, March 21.—On the eve of his departure from the city on a short lecturing trip, Speaker Clark was called to the White House to a conference. The foreign situation is worrying the president. Complications are growing and legislation may be required to meet conditions that are now confronting the administration, the president, it is said, not being willing to assume all responsibility. It is reported that the president talked quite frankly with the speaker and intimated his fears that Congress would have to be assembled.

The two men are to meet again.—Norfolk Virginian-Pilot.

PARIS, MARCH 22.—A News dispatch from Milan states that Commerce between Italy and Dalmatia has been suspended. The commander of the Italian fleet announced that he would seize ships of any nationality in the Adriatic conveying goods to Austria.

BOTH SIDES PREPARING FOR BATTLE

London, March 22.—The relations between Italy and Austria have reached an acute stage. A Rome dispatch says Austria and German subjects have been advised by their consuls to leave Italy in the shortest possible time and that a number of Germans who recently arrived in Italy are being watched because of a suspicion that they are military spies.

There have been reports for some days that Germany's efforts to secure the continued neutrality of Italy by inducing Austria to cede Trent and other territory to her were not meeting with success. Italy, it was said, was demanding that the territory be handed over to her immediately, but that the Teutonic allies desired to make the transfer after the war.

Later there were reports that Austria had begun strengthening her southern frontier, and according to a dispatch received in Paris from Rome yesterday Italian officers of all arms belonging to the first line, who have been on half pay, have been called to the colors. In military circles here this order is considered significant, it being contended that these officers belong to the public administration, from which they would not be called unless the situation was serious.

RECAPTURED FROM THE RUSSIANS

SOLDIERS OF GERMANY RETAKE MEMEL AND SCORE OTHER IMPORTANT SUCCESSES

Berlin, March 22.—The German seaport of Memel, which was occupied by the Russians Thursday, was recaptured Sunday by the Germans after terrific hand to hand fighting in the streets.

The Russian attacks north of Mariampol have been repulsed, the enemy suffering severely. West of the Orso river, near Jednorozek, northeast of Pzhanzsky and northwest of Cichanow, the Russian attacks have been repulsed. Over 400 Russians were captured in these engagements.

The French attempt to take the German position south of Lorette Heights has failed. French attacks north of Lesmesnil and Reichacker Kopf, in Alsace, were unsuccessful.

SWITZERLAND SUFFERS

Worse than Any Other Neutral Nation from the War

Geneva, March 22.—In proportion to her position, population and area, Switzerland is suffering financially perhaps more than any other neutral nation. She has spent over \$60,000,000 on her army; she has lost several millions on her exports and as much in decrease of production of her industries closed for lack of raw material. From Aug. 1 to the end of December the hotels in the Bernese Oberland alone have a deficit of \$5,000,000 owing to the loss of American and English patrons.

Mrs. Gertrude DeLancey is having much success in selling the Blackstone vacuum massage machine. This is a handy little contrivance, which should have a place on every toilet table. It costs very little money and would save anyone particular about their complexion both money and time.

Mr. Caldwell, superintendent of the electric plant, and his assistants sacrificed most of their Sunday rest yesterday to putting in new transformers at the corner of Fort King avenue and Main street. The elevators in the Ocala House, Harrington, Holder block and the machinery in three factories are governed by these transformers, so Sunday morning is the only time when they could be changed without great interference with necessary work. The change from six small transformers to three large ones will save the city considerable money in the course of a year, beside reducing the probability of accident.
